GEOGRAPHIC INTELLIGENCE REPORT

TERRITORIAL-ADMINISTRATIVE DIVISIONS OF THE USSR

CIA/RR-GR-155

January 1958

CENTRAL INTELLIGENCE AGENCY

FOR OFFICIAL USE ONLY

ERRATA

- p. 125 The remarks in the entry for Chunskiy rayon should read: "Created from parts of Alzamayskiy, Bratskiy, Tanguyiskiy, Tayshetskiy, and Shitkinskiy rayons. Center shifted from Chuna to Oktyabrskiy, June 1955."
- p. 182 The first item of the first entry should read "Permskaya Obl."
- p. 240 The second line of the remarks under Urus-Martanovskiy rayon should read "Ingushskaya ASSR. Names changed from Urus."
- p. 245 The second entry, Kabardino-Balkarskaya ASSR, is a major division and should begin at the top of the page. The first entry belongs to the preceding division.
- p. 264 There is no reason for the break between Gamskiy and Gissarskiy rayons. The word "obl" at the top of page 265 is part of the Gamskiy rayon entry.

FOREWORD

This report is a list of Soviet territorial-administrative units down to and including the rayon level.\* It is a revision of CIA/RR-GR-63 (October 1954), Territorial-Administrative Divisions of the USSR, which presented the basic administrative structure of the USSR as of June 1954. The revised report incorporates information on administrative changes up to mid-1957. A major addition to the revised edition is the accompanying Atlas of Soviet Territorial-Administrative Maps, which shows territorial-administrative boundaries to the rayon level. The atlas includes 50 oblast and republic maps of recent date and provides coverage for about half the total area of the Soviet Union.

In GR-155, union republics are listed alphabetically, with the subdivisions of each republic following in alphabetical order. In the case of the RSFSR, all krais are listed first, then all oblasts, and lastly all ASSR's. Rayons are listed alphabetically under each of these entries. Specific information on each unit is presented in tabular form; and, reading from left to right, is as follows:

\* Research data were processed for this report by OCD/MD.

- 
- (1) Name of the administrative unit.  
(2) Administrative center of the unit.  
(3) Location of the administrative center in degrees and minutes of latitude and longitude. Symbols for degrees and minutes are omitted. For example,

N 4503 E 04149 is to be interpreted as N  $45^{\circ}03'$ -E  $41^{\circ}49'$ .

(4) Area of administrative unit in thousands of square kilometers. For example, 0024.6 is to be interpreted as 24,600 square kilometers.

(5) Date of establishment or known existence of the unit. The first two digits are omitted, so that 1938 appears as 38.

Remarks, where needed, are centered below columns (3), (4), and (5) and include data on transfers of subordination, creation of units, shifts of administrative centers, name changes, and other pertinent information.

Names in columns (1) and (2) are transliterated from the Russian, using the system approved by the U.S. Board on Geographic Names. Names of administrative units thus appear in the Russian adjectival form. In a few cases, where names of administrative units are too long to be included on IBM cards, the adjectival

endings have been abbreviated. For instance, Ust'-Ordynskiy Buryat-Mongol'skiy Natsional'nyy Okrug has been entered as Ust'-Ordynskiy Buryat-Mongol' N.O. Major administrative units are abbreviated as follows: SSR(Soviet Socialist Republic), ASSR (Autonomous Soviet Socialist Republic), Obl (Oblast), A.O. (Autonomous Oblast), and N.O. (National Okrug). In the rayon names listed under these larger units, the word "rayon" has been omitted.

The sources used for the location of administrative centers included the Preliminary NIS Gazetteer of the U.S.S.R. and numerous Russian maps of various scales and publication dates. Although the coordinates given for these centers are as nearly accurate (to the nearest minute) as possible, they are to be used for general locational purposes only, since the small scale of some of the source maps precludes absolute accuracy. In a few cases involving recent shifts of administrative centers, no coordinates are as yet available.

Area figures given are only approximate. The basic source for major administrative divisions is dated 1954 and for the rayon level, 1947. The exact size of areas involved in boundary changes since these dates is not known; consequently,

Approved For Release 2000/05/11 : CIA-RDP79-01009A001600120002-0

areas given for administrative units that have experienced change must be regarded as estimates.

Column (5) gives dates of establishment for all larger units and dates of establishment or known existence for rayons. If the date given for a rayon is 1938, it

generally indicates that the rayon was known to be in existence at that time but had been created at an earlier date. The relatively few rayons that were actually established in 1938 are identified by the explanatory remarks. All dates later than 1938 are the dates of establishment. Wherever it could be determined, the year of establishment is given; if the year is not known, inclusive dates are supplied. Thus, the entry 41-47 indicates that the rayon was not in existence in 1941 but had been created by 1947.
